

TABLE OF CONTENTS

Executive Summary	iv
Introduction.....	viii
Background	viii
Process	x
Assumptions.....	x
Limitations	xi
Products.....	xi
Chapter 1—Setting Up the Analysis	1
Objectives of the Analysis	1
Analysis Area and Scale This analysis will:	1
Interdisciplinary Team Members and Participants	1
Types of Forest Roads	2
Operational and Objective Maintenance Levels	3
Road Management Objectives	3
Maintenance Levels	3
Design of the Forest Scale Analysis	6
Information Needs	9
Public Involvement	10
Chapter 2—Describing the Situation.....	12
History of Forest Transportation System Development	12
Forest Plan Objectives	16
Federally Designated Forest Highways	18
Scenic Byways and Scenic Corridors	20
Public Forest Service Roads	21
Basic Types or Categories of Road Maintenance	22
Maintenance Activities and Frequencies	23
The Costs of Maintaining the Classified Road System	24
Recent and Foreseeable Road Maintenance Budgets	30
Chapter 3—Identifying Issues.....	32
Introduction.....	32
Road Analysis Issues at the Forest Scale.....	32
Road Analysis Issues at the Sub-Forest Scale	33
Chapter 4—Assessing Benefits, Problems, and Risks.....	36
Introduction.....	36
Tools and Methods for Assessment	36
Watershed and Aquatics Risks of the Minimum Primary Road System	36
Watershed and Aquatic Risks by 6 th Level HUC	37
Chapter 5—Describing Opportunities and Setting Priorities.....	39
Opportunities for Changes in Road Management Strategy	39
Potential Minimum Primary Road System Risks & Opportunities	40
Road Maintenance Costs – Comparing the Recommended Minimum Primary Road System to the Current System.....	42

Malheur National Forest—Roads Analysis

Areas Needing Primary Access Roads	45
New Road Construction in Currently Unloaded Areas	46
NEPA Analysis Needs	46
General Road Management Guidelines	47
Road Decommissioning	48
Road Closures	50
Capital Improvement Guidelines	51
Reducing Road Related Watershed and Aquatic Risks	52
Chapter 6—Key Findings	54
References	58
Appendix A	1
Appendix B - Maps 3 maps available on FSWeb or CD edition.	1
APPENDIX C. Ecological, Social, and Economic Considerations	1
Ecosystem Functions and Processes (EF).....	1
Historic Fire Occurrence.....	5
Weather Patterns and Fire Season Parameters.....	7
Aquatic, Riparian Zone, and Water Quality (AQ).....	9
Terrestrial Wildlife (TW).....	17
Economics (EC)	21
Commodity Production (TM, MM, RM, SP, SU)	23
Timber Management (TM)	23
Minerals management (MM)	27
Range management (RM)	30
Water Production (WP).....	31
Special Products (SP).....	34
Special Use Permits (SU).....	34
General Public Transportation (GT)	35
Administrative Use (AU).....	44
Protection (PT).....	46
Recreation (UR, RR).....	51
Social Issues (SI).....	59
Cultural and Heritage (CH).....	63
Civil Rights, and Environmental Justice (CR).....	64
Appendix D – Watershed Risk and Aquatics Risks by 6th Level HUC	1
Methods and Assumptions.....	1
Subwatershed Risk Ratings for Watershed/aquatics risk assessment	1
Table of Figures	
Figure 1-- Fire Occurrence Map 1970-2001	Appendix C 6
Figure 2 --Fire Occurrence 1970-2001	Appendix C 7
Figure 3– Graph C-1 identifies the lightning wildland fire trends for the Forest from 1970 through 2001	Appendix C 8
Figure 4– Byram Gulch	Appendix C 32
Figure 5-- Long Creek Mountain.....	Appendix C 33
Table of Tables	
Table 1 – Current Operational and Objective Maintenance Levels for classified roads. ...	6
Table 2 – Malheur National Forest – Road Miles.....	17

Malheur National Forest—Roads Analysis

Table 3 – Federally Designated Forest Highways	18
Table 4 – Potential Public Forest Service Road Projects.....	22
Table 5 – Road Maintenance Frequencies	23
Table 6 – Surface Rock Replacement Costs Estimates	26
Table 7 – BST Surface Maintenance/Replacement Costs	26
Table 8 Asphalt Chip Seal and Overlay Costs.....	27
Table 9 – Costs to maintain current OML 3-5 road surfaces.....	28
Table 10 – Surface Costs to maintain current ObML road surfaces.....	28
Table 11– Estimated Annual and Deferred Maintenance costs to maintain the road system to OML, and Capital Improvement Costs to complete planned Capital Improvements.	29
Table 12 – Estimated Annual and Deferred Maintenance costs to maintain the road system to ObML, and Capital Improvement Costs to complete planned Capital Improvements.	30
Table 13 – Sub-watershed Risk Rating Summary.	37
Table 14– High Priority Sub-watersheds on the Malheur	38
Table 15– Estimated Annual and Deferred Maintenance costs to maintain the road system to current OML, and Capital Improvement Costs to complete planned Capital Improvements.	43
Table 16– Estimated Annual and Deferred Maintenance costs to maintain the recommended minimum primary road system to recommended OML, and Capital Improvement Costs to complete planned Capital Improvements.	43
